A believer of excellence, having the zeal to up-skill, being efficient & productive for the company & develop as well as diversify my professional skill set. Looking forward to working as a software developer in a Multinational Corporation to get exposure to international clients.

---

## Experience

DEC 2017-PRESENT

**Software Web Developer/Canadian University Dubai, Dubai, UAE**

Had a great experience and exposure to the modern techniques and frameworks in .net and created and maintained many small applications for different department.

- Review, update, and revise codes for internal portals in premises.
- Requirement gathering from external and internal stakeholders and translating these into tech solutions
- Revamped online application of the university from classic asp to asp.net MVC with entity framework, jQuery, JavaScript, HTML5 and Bootstrap.
- Integration with different 3rd parties like SIS & CRM's like (Active Campaign & Oracle)
- Build system to integrate with CyberSource payment gateway. All internal portals use that to integrate with the payment gateways.
- Created a structure for API and web and window services.
- Created a web API for integration and exposing and manipulating the main system data (Student Information System)
- Built a **career portal** for students which have all extensive logins for student, employer and admins and system would differentiate based on their roles.  
**Techs Used:** - .Net core (.Net 5), Rest API, Entity Framework, jQuery, HTML5, Bootstrap, SQL
- Built many small applications for finance and registration departments like Invoice Generator, Quotation Generator and Advisor Update App.  
**Techs Used:** - Asp.Net MVC 5, Rest API, Entity Framework, jQuery, HTML5, Bootstrap, SQL

SEP 2016 – SEP 2017

**Software Programmer/Coelho System, Chennai, India**

**AACO (AIDS Activities Coordinating Office): It is the contractual financial management system.**

For the services of the AACO system the federal and state government in USA providing funds. There is lot of funding source to provide the financial help. Once getting the fund from the source they will make a budget plan for the year. And then they will make it as an input to the expenditure system. From the expenditure system they will generate the invoices. And then they will send the generated invoices to the payment system. Then the payments can be made for the corresponding budget.

- Designed Web pages and developed functionalities for the product.

- Designed and modified Stored Procedures to corresponding functionalities.
- Modified Web forms and added functionalities as per new enhancements.
